🗺️ Stage Navigator

Know what to expect, what to watch for, and what to do next.

Dorothy's current stage

1. Independent | **2. Early Assistance** | 3. Moderate Care | 4. Advanced Care | 5. End of Life

Stage 2: Needs help with IADLs — finances, cooking, medications. Cognition mostly intact. Watch for falls, weight loss, missed appointments.

WARNING SIGNS — WHAT TO WATCH FOR

Forgetting recent conversations	Cognitive	Monitor
Two falls in the past month	Physical	See doctor
Skipping meals	Functional	Monitor
Unpaid bills piling up	Financial	Act now
Withdrawing from social activities	Social	Monitor

WHAT'S COMING IN STAGE 3

Decisions to prepare for

- In-home care evaluation
- Consider activating financial POA
- Assess driving safety
- Assisted living research

CONVERSATION GUIDES

💬 Talking about driving — Stage 2–3
When to raise it, how to approach it

💬 Discussing finances — Stage 2
Opening the conversation about money and POA

💬 Moving out of the home — Stage 2–3
Timing, framing, what to expect emotionally

💬 End-of-life wishes — Any stage
Starting the conversation before it's urgent

NORMAL AGING VS. CONCERN

Normal aging

Forgetting names temporarily
Slower processing speed
More cautious movement

⚠️ Worth noting

Forgetting recent events
Sudden confusion
Repeated falls

SHARED CARE LOG

Apr 18 · Sarah — Cognitive
Mom seemed confused at dinner for ~20 min. Back to normal after rest.

Apr 17 · Sarah
Picked up Lisinopril refill. She mentioned knee pain when walking.

Apr 15 · Mark
Sunday call — good mood, watched baseball. Asked about Dad a few times.

Apr 13 · Amy — Nutrition
Video call 20 min. She looked a bit thin. Asked Sarah to check on eating.

Apr 12 · Sarah — Medical
Cardiology appointment confirmed for Apr 24. Dr. Rivera notes to continue current meds.

  → Sarah · Due Apr 20 — High

- [ ] Call cardiologist re: April visit
  → Sarah · Due Apr 25 — Med

- [ ] Review LTC insurance renewal
  → Unassigned · Due May 1 — High

✨AI Assistant

Plain-English answers, personalized to Dorothy's situation.

SUGGESTED FOR YOU

- What does Mom's POA allow me to do?
- Is Sertraline safe for an 78-year-old?
- How do we prepare for the cardiology visit?
- What triggers LTC insurance benefits?
- What should I watch for in Stage 3?

What does Mom's POA allow me to do?

Based on the Financial Power of Attorney document you uploaded for Dorothy (dated March 2023), you have authority to:

- Manage bank accounts and pay bills
- File tax returns on her behalf
- Handle real estate transactions
- Manage investments and retirement accounts

This POA is durable, meaning it remains in effect if Dorothy becomes incapacitated. Note: it does not grant healthcare decision authority — that requires a separate Healthcare Proxy, which you haven't uploaded yet.

💡 You should ask your attorney: whether this POA covers digital accounts.

Is Sertraline safe for Mom at her age?

Sertraline (Zoloft) is flagged on Dorothy's medication list with a Beers Criteria alert. This means it's listed as potentially inappropriate for adults 65+.

For elderly patients, SSRIs like Sertraline can increase risk of:
- Falls (from dizziness/hyponatremia)
- GI bleeding (especially with NSAIDs)
- Drug interactions

This doesn't mean she should stop it — the risk vs. benefit for depression treatment is often worth it. I'd recommend asking Dr. Park at the next PCP visit to review this specifically.

Ask anything about Mom's care...

Send

💡 **Proactive nudge:** Medicare Open Enrollment starts in ~180 days. Want me to prepare a review checklist for Dorothy's drug formulary?

Yes, prep it
